Easier Operations
& Consistent Quality

It all starts with a
NESCAFÉ®

Sustainable Coffee: Show **Consumers** You **Care**

The NESCAFÉ® Plan is a global sustainability programme that creates benefits for everyone involved in coffee farming, production and consumption, helping to guarantee the future supply of coffee.

Choose NESCAFÉ and you're making a responsible decision that benefits everyone: from your business and consumers, to coffee farmers and the environment.

Always Creating the Next **Big** thing

For over 75 years we have been developing category-changing innovations that delight consumers and help you stay ahead of the game.

It all happens at our state of the art Nestlé Research Centre and network of Product Development Centres, where over 200 experts are constantly working to drive innovation and improve the coffee experience for everyone.

HELPING FARMERS

Launched in August 2010, the NESCAFÉ Plan is a global initiative for the entire Nescafé brand that aims to work with our coffee farmers to help them build a more robust business by providing training in responsible farming and production, technical support and healthy coffee plants.

Satisfy **Every** Customer

We have spent the past 75 years deepening our understanding of how people love to enjoy their coffee, and adapting our 100% pure coffee recipes to suit changing times and tastes.

Our extensive product portfolio caters to different preferences, so you can rest assured that we have a beverage to meet your needs.

Serve **Delicious,** **Authentic** Beverages

We are passionate about coffee and committed to delivering only the best quality end cups.

By selecting the finest beans and tasting each batch throughout production, we ensure all our coffee meets the approval of a professional panel of coffee experts. That's NESCAFÉ quality.

The Perfect Solution for Operators

At Nestlé Professional we truly understand vending, using our extensive knowledge and experience to provide the products and support you need to grow your business.

From insight and market understanding, to Point of Sale materials and promotions – we'll advise you on the best techniques to help boost your sales, while also providing products that perform consistently well in the machine.

NESCAFÉ® is the world's favorite coffee

As a brand, **NESCAFÉ delivers recognition and trust**, reassuring consumers they'll receive a quality end cup.

Greater Performance, Greater Profits

Soluble coffee machines are made to be **hassle-free**, with much simpler technology and fewer parts than roast & ground systems – leading to **less downtime** and more cups sold.

The proprietary technology used to produce NESCAFÉ is resistant to stressful conditions and only requires a **low level of machine maintenance**. There's significantly less caking, blocking and bridging.

NESCAFÉ is produced in specific weight and particle sizes to deliver accurate dosing, resulting in **consistent end cups**.

Our **user-friendly packaging** makes it easy to stock and easy to refill the machine. It also ensures **lasting freshness** to provide consistent taste over time, thanks to protection against humidity and oxygen.

Less storage space is required, **so transport costs are reduced**. And with zero waste produced, no waste removal is needed – **leading to fewer service visits**.

Compared to roast & ground, NESCAFÉ's 100% pure coffee comes out on top, leading to **more profits** for your business.

1 Machine

80 cups of coffee/day, over 1 year

100% Coffee

Our Coffee Journey –
from Farm to Cup

1 Farming

Once ripe, our coffee cherries are harvested by hand. As beans ripen at different times, this manual process ensures only perfect beans are selected.

2 Blending

Our skilled coffee experts taste various beans and blend them to create a high quality coffee.

3 Roasting

We roast the beans to bring to life the full flavor and aroma of each bean, creating a rich and balanced coffee.

4 Grinding

We carefully adjust our grinders so we are able to extract the best flavors and aromas from each bean.

5 Brewing

We take the ground coffee and pour hot water through it to extract just the right amount of flavor.

7 Preparing

Our pure coffee extracts and coffee machines work in perfect harmony together. All you have to do is press the button and let the magic happen.

6 Drying

We then take the brewed coffee and simply evaporate the water, which leaves us with the pure coffee extract.

Our Coffee Range

NESCAFÉ is the people's coffee. By developing a range of products based on knowledge of what consumers want, we offer coffee-lovers around the world their own personalized cup. 100% Pure Premium coffee made with responsibly sourced beans.
