

Think simplicity. Serve Vitality®

At Nestlé Professional, we believe you and your guests should have a beverage service experience that is as simple and satisfying as the beverage itself. To support this goal, we have worked tirelessly to minimize the complexity of the Nestlé Vitality® Express system. The result is highly efficient beverage service that keeps uptime up, waste and labor down, and everyone refreshed.

Turn the page to see how simple it can get.

# More beverage. Less dispenser.

Vitality® Express is engineered to require less labor and create less waste than other dispensers. With our proprietary system, you won't find any hoses, hard-to-access pumps or unnecessary maintenance needs. You will find a patented pump that comes new on each Express Pak, ensuring delivery of cold, delicious juice, lemonade, flavored water and iced tea choices.

**YOU SEEK EFFICIENCY.  
WE DELIVER WITH SIMPLICITY.**

With Flavor Flip™, it's super easy to switch flavors based on daypart and offer a beverage assortment that's right for you.

Proprietary design creates virtually zero beverage waste.

Cleans in four user-friendly steps, saving labor vs. the 15 time-consuming steps that others require.

Training and troubleshooting are so simple that instructions fit on the unit's door.

Nestlé Professional is always there as your trusted partner, helping customize your beverage program and resolving any issues.

**Express Touch** (shown above): minimum of 10 cases / 70 cups per day, ideal for front-of-house applications.  
**Express Extra** (shown on opposite side): minimum of 8 cases / 55 cups a day.

**Master your cold beverage service with ease and confidence.**
